

KRISHNENDU MAJUMDER

AI/ML Developer | Computer Science Engineering

Kolkata, India | +91 90387 09232 / +91 90389 59441 | krishnendumajumder32@gmail.com
linkedin.com/in/krishnendu-majumder-a376b83a8 | github.com/Krishnendumajumder

PROFILE

Computer Science Engineering graduate with foundations in Python, SQL, Java, C, data science, and machine learning. Interested in web development, data science, artificial intelligence, computer vision, and geospatial workflows. Experience includes satellite-based agricultural analysis and multi-temporal crop classification workflows.

PROFESSIONAL EXPERIENCE

AI/ML Developer Intern - PlanetEye Farm-AI Limited

6-month paid internship | Agriculture, remote sensing, and AI/ML

- Worked with Sentinel-1 SAR and Sentinel-2 multispectral imagery for agricultural analysis.
- Supported multi-temporal crop classification and prediction workflows using satellite bands and vegetation indices.
- Worked with geospatial KML field data and Google Earth Engine workflows for data extraction and analysis.
- Contributed to AI/ML agriculture applications focused on crop monitoring and precision farming.

TRAINING

Full Stack Development in Python - National Institute for Industrial Training, Kolkata

July 2024 - August 2024

Developed a full-stack social media platform concept covering profile creation, friend connections, posts, real-time messaging, and moderation. Training covered Python frameworks, databases, REST APIs, authentication, WebSockets, and modern frontend technologies.

PROJECTS

Satellite-Based Crop Classification & Prediction

Developed a multi-temporal crop-classification workflow using Sentinel-1 SAR and Sentinel-2 multispectral imagery. Used satellite bands and vegetation-related indices across crop-growth stages to compare temporal spectral and radar characteristics.

Transmission Tower Detection & Thermal Distress Monitoring

Developed a satellite-based infrastructure-monitoring workflow using RGB, thermal, and 3D information, with attention to tower detection, thermal anomalies, structural condition, and nearby vegetation.

P-Median Facility Location Optimization - IBM CPLEX (OPL)

Implemented a mixed integer programming model with binary facility-opening and customer-assignment variables for a nine-city network. Enforced one assignment per customer and $P = 3$ open warehouses.

EDUCATION

B.Tech, Computer Science Engineering RCC Institute of Information Technology, Kolkata	July 2022 - June 2025
Computer Science and Technology Elite Institute of Engineering & Management, Kolkata	June 2019 - June 2022
Higher Secondary / Secondary Education Hare School, Kolkata	2019 / 2017

SKILLS & LANGUAGES

Technical: Python, SQL, Java, C, data science, machine learning, Google Earth Engine, remote sensing, computer vision, IBM CPLEX, OPL
Languages: English, Hindi, Bengali
